SUMMARY

A self-motivated, hardworking student in IT, I am seeking an internship position to work in the IT sector of different local or multinational software companies, in its web applications development department and grow rapidly with increasing responsibilities.

PROJECTS

[AmraFit] – Are you ready to take your fitness to the next level?

- It's a clone website of *AmraActive*.
- people can make sense about our services
- Technologies are used such as React, Bootstrap, CSS

[ME.] – It's a personal website for a Software Engineer.

- It makes him globalized & everybody can understand about his work.
- Technologies are used such as React, Bootstrap, SASS

[ContactBook] – It's a Contact Management System.

- Users can store contact information.
- User can add new contact details, can delete existing details, can update existing details.
- Technologies are used such as React, Bootstrap, Express.js, MongoDB, React Router, Express Router, Mongoose, REST APIs, Axios

PUBLICATIONS & OTHERS

- N. Sarker and Mr. Priom. Usability Analysis for MFS: for learning to plan paths from large scale preference feedback.
- As a JavaScript content creator, I specialize in crafting engaging articles & notes that simplify complex concepts for diverse audiences. [github.com/noyon674/JS-notes]
